Water-based finishes are applied to the surface of the floor. They are typically clear and are very durable.

Bona Waterborne Finish

Oil-based finishes are applied to the surface of the floor. They are amber, will turn yellow over time, and are very durable.

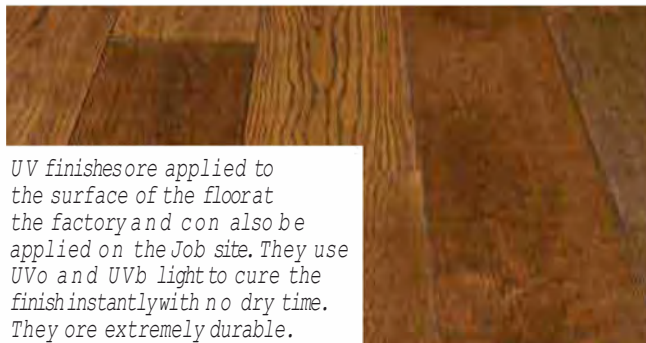

Moisture-cured finishes are applied to the surface of the floor. They can be clear to amber in color and are extremely durable.

Natural oil finishes can be penetrating oils or hard wax oil finishes. They penetrate into the pores of the wood to achieve a durable, long-lasting finish.

UV finishes are applied to the surface of the floor at the factory and can also be applied on the job site. They use UVa and UVb light to cure the finish instantly with no dry time. They are extremely durable.

Conversion varnish finishes are applied to the surface of the floor. They are clear to slightly amber and are extremely durable.

Wax finishes are the oldest floor finish in use today. They are applied in thin coats and soak into the pores of the wood. The coats are buffed and harden to form a protective penetrating seal.
