## Why is Pickleball Court Flooring Important?

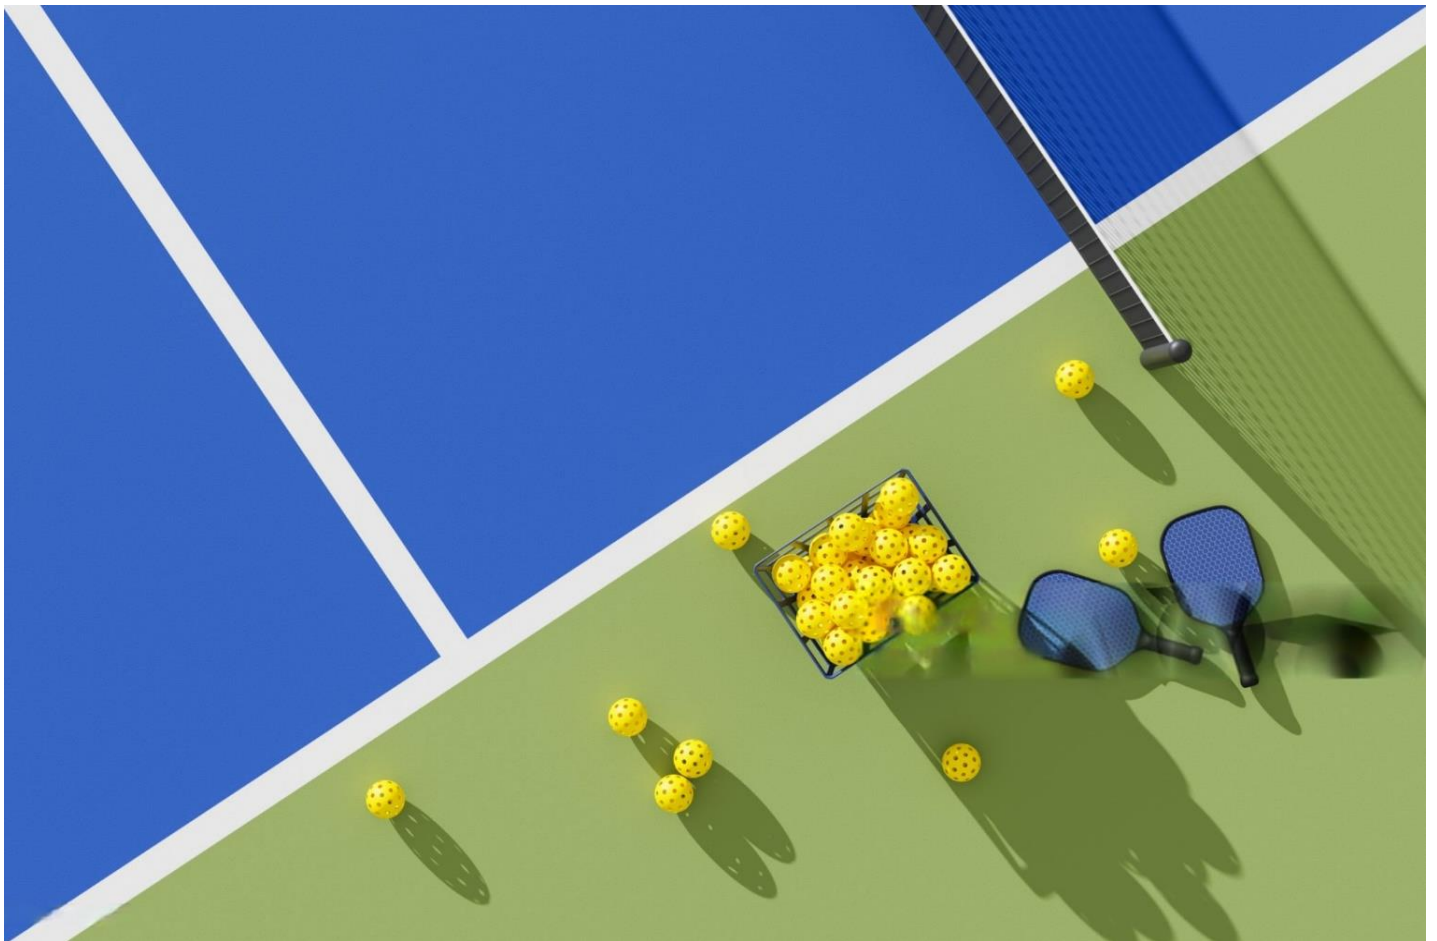

Pickleball, a fast-growing sport, is played on a court with dimensions similar to a badminton court. Proper flooring not only enhances **game performance** but also helps in minimizing the risk of injuries.

Whether your court is located **indoors** or **outdoors**, the **right flooring** plays a critical role in ensuring a **smooth playing experience**, while withstanding the **wear and tear** of constant use. The material must be durable, slip-resistant, and suitable for various weather conditions.
