

# Cycling Tracks

The best material for cycle tracks is asphalt, which is why asphalt is the standard surface on cycle tracks. Asphalt provides an even surface, and can be repaired as a matter of routine. Asphalt concrete is produced by mixing hot.

## POLYURETHANE

### PRODUCT DESCRIPTION

Polyurethane Flooring has a specialized UV coating and more dimensional stability due to an elastomer layer. It is constructed on site and is extremely customizable.

### LAYERING

### DIMENSION & COLOR

Available in various dimensions and colors as per client requirement.

### INDUSTRY APPLICATIONS

- High-end Gym
- Horse Stable
- Animal Farm
- Jogging Track
- Running Track
- Cycling Track
