SILVER KNIGHT
iGUARD SURFACE

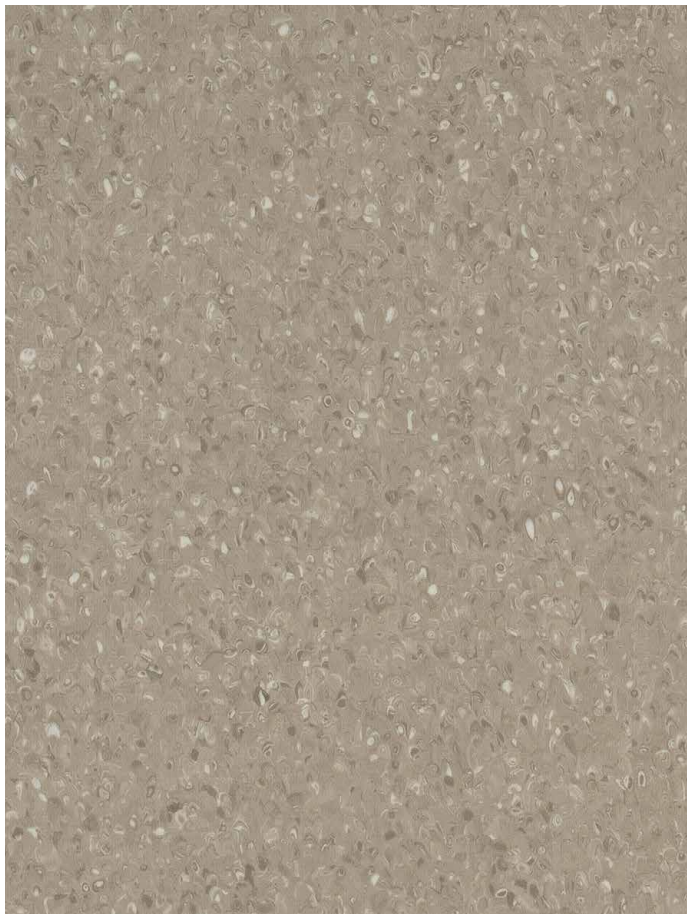

The new Silver Knight has an integrated self-disinfecting property that provides a broad spectrum and long-lasting hygiene thanks to its modified silver content.

As a result of Silver ion, the microbe is destroyed in a short time. Test results by independent institutes have certified that products with Grabo Silver Knight surface are effective against the most common bacteria and even kill 99,9% of human coronavirus.

1. Silver disrupts the cell wall of the bacterium
2. Modfies the enzymes needed for the energy production of the cells, so the pathogen does not get nutrients
3. and inhibits the reproduction of the bacterium's DNA, preventing it from multiplying.

TECHNICAL DATA

POLIS SILVER KNIGHT

DESCRIPTION			POLIS SILVER KNIGHT
Binder content		EN ISO 10581	Type I.
Total thickness	mm	EN ISO 24346	2.0
Wear layer thickness	mm	EN ISO 24340	2.0
Width of roll	m	EN ISO 24341	2
Length of roll	lm	EN ISO 24341	20
Total weight	kg/m²	EN ISO 23997	2.8
CLASSIFICATION			
European classification		ISO 10874	34/43
PERFORMANCE			
Residual indentation	mm	EN ISO 24343	max. 0.1
Dimensional stability	%	EN ISO 23999	max. 0.2
	%	EN ISO 23999	average 0.1
Fire resistance		EN 13501-1	B_{fl}-s1
Slip resistance		DIN 51130	R9
		EN 13893	DS
Electrical resistance	kV	EN 1815	< 2
Chemical resistance		EN ISO 26987	✓
Light fastness		EN ISO 105-B02	grade 6
Castor chair resistance		EN ISO 4918	✓
Surface treatment			Silver Knight iGUARD
Bacteriostatic activity		ISO 22196	>99%
Antiviral activity		ISO 21702	>99%
Seaming method			heat or cold weld
Warranty			15 years

NO WAX

ECOLOGICAL FORMULA

Environmental attributes of Grabo vinyl sheet floorings

PHTHALATE FREE TECHNOLOGY

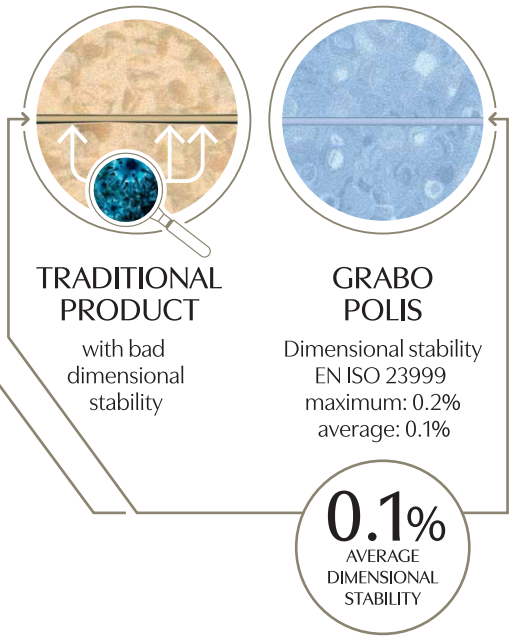

NO WASTE PRODUCTION

100% RECYCLABLE

CE

With the development by Graboplast, Grabo homogeneous products launch a new category in the world of homogeneous floors.

The dimensional stability of homogeneous floors, acc.to EN ISO 23999 standard, is maximum 0.4%. Thanks to our special manufacturing technology, GRABO homogeneous floors change their size on average only by a fourth of this value, compared to the others, therefore they can resist the passing years much better.
Changes in the dimension of the floor coverings might cause gaps alongside the weldings, where pathogens and contamination might settle then, making appropriate cleaning and disinfection almost impossible. This is prevented by the new development of Graboplast, which makes maintenance even easier, guaranteeing a trouble-free surface for a long time.
