About

Mattex

Mattex is a specialized global manufacturer of polymer-based synthetic materials, delivering high-performance technical textile solutions for the flooring, artificial grass, and geosynthetics industries.

Established in 1996 in **Jeddah, Saudi Arabia**, Mattex has built a strong reputation for engineering expertise, product consistency, and application-driven innovation. Our solutions are developed to perform reliably under challenging environmental and load conditions.

With advanced manufacturing facilities in Saudi Arabia and a network of strategically located warehouses and sales offices across **Europe, the Middle East, North America, Latin America, and Asia**, Mattex supports customers worldwide with efficient logistics and project- specific technical support.

Through close collaboration with Mattex's vertically integrated manufacturing capabilities—including artificial grass yarn production, backing technologies, and geosynthetic solutions — ZAYAANCO ensures consistent product quality and reliable supply to customers across regional and international markets.

Our turf systems are designed to meet international performance standards and are suitable for projects ranging from professional sports installations to decorative landscape applications.

At ZAYAANCO, our goal is simple: to create durable, beautiful, and high-performance artificial grass systems that transform spaces into vibrant green environments all year round.

Key Strengths

Advanced artificial grass manufacturing

Backed by Mattex Group's global expertise

High-performance yarn technologies

Consistent quality and durability

Solutions for sports and landscaping applications

Designed for diverse climates and heavy use environments

Our Commitment

Zayaanco is committed to delivering reliable turf systems, technical expertise, and long-term value for clients, contractors, and project developers. From product development to installation support, we focus on providing solutions that combine performance, aesthetics, and efficiency.

Sustainability Commitment

Zayaanco is committed to environmental responsibility through innovative and sustainable artificial grass solutions.

Our sustainability efforts include:

ENMS 50001 Certification: Ensuring energy efficiency in production

ISO 14001 & ISO 50001: Demonstrating our environmental management excellence

Water Conservation: Saving millions of liters of water annually

Chemical-Free Maintenance: No need for fertilizers or pesticides

Durability & Recycling: Long lifespan and recyclability reduce environmental impact

Vertically Integrated Manufacturing

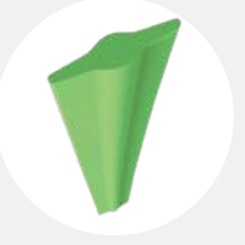

Green Vision takes pride in its fully integrated production process, ensuring quality control at every stage.

Our Backing

100%

Vertically Integrated

Our Yarn

Way ahead of the Game

From raw materials to the final product, we oversee:

- **Raw Material Selection:** High-quality polymers for superior turf and masterbatch
- **Yarn Extrusion:** Advanced fiber technology for durability and huge variety of Yarn
- **Tufting & Backing:** Precision-engineered backing for stability and huge capacity
- **Coating & Finishing:** Enhancing product longevity and performance

Why Choose Artificial Grass?

Low Maintenance
No mowing, watering, or fertilizing.

Durability
Withstands heavy foot traffic and extreme weather conditions.

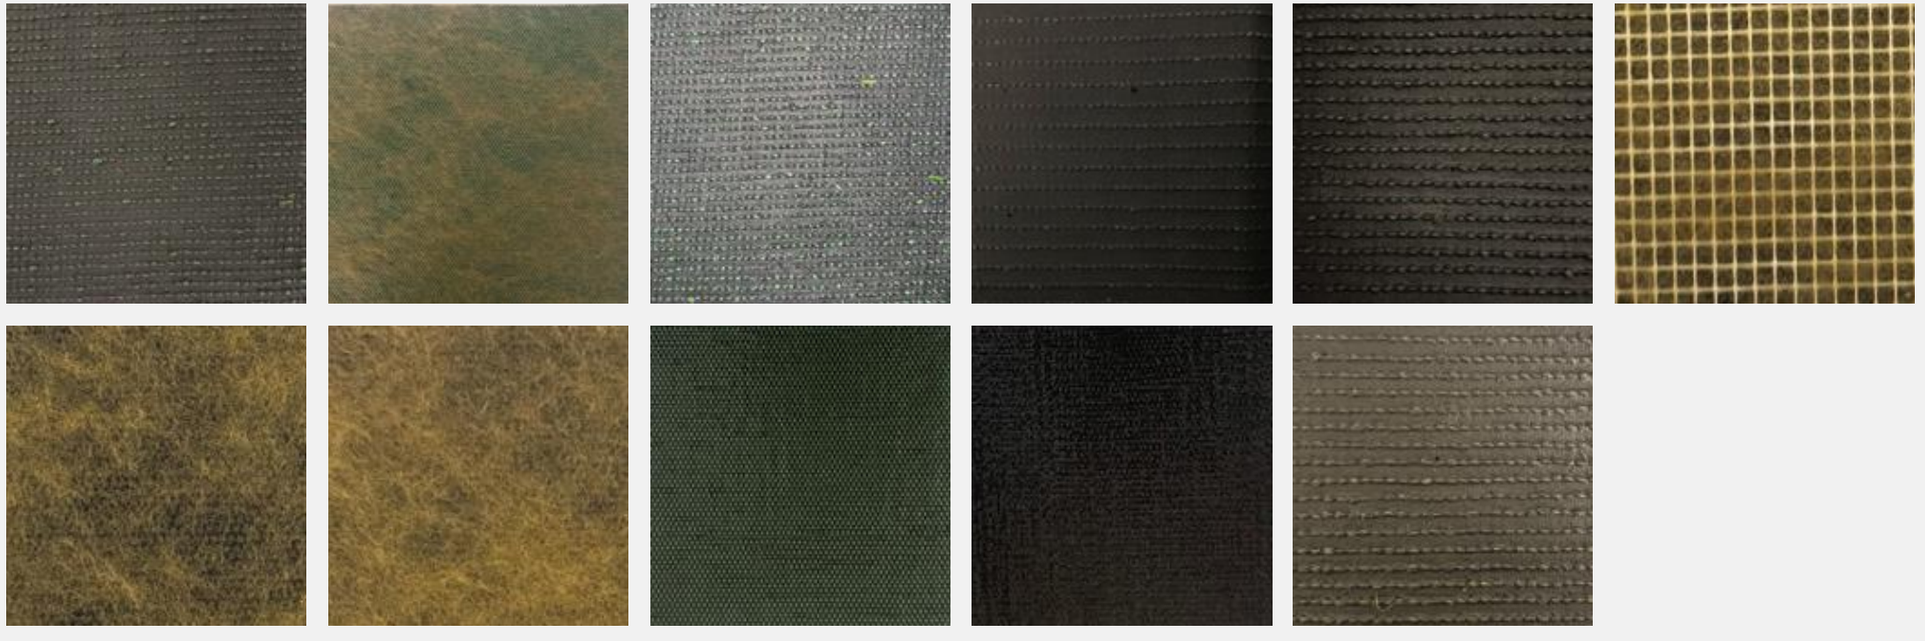

All-Season Green
Stays lush in all weather conditions.

Kid-Friendly & Pet-Friendly
Soft, safe, and non-toxic.

Chemical-Free & Eco-Friendly
No pesticides, fertilizers, or excessive water usage.

Backing Systems

Mattex offers a variety of backing technologies to enhance turf performance:

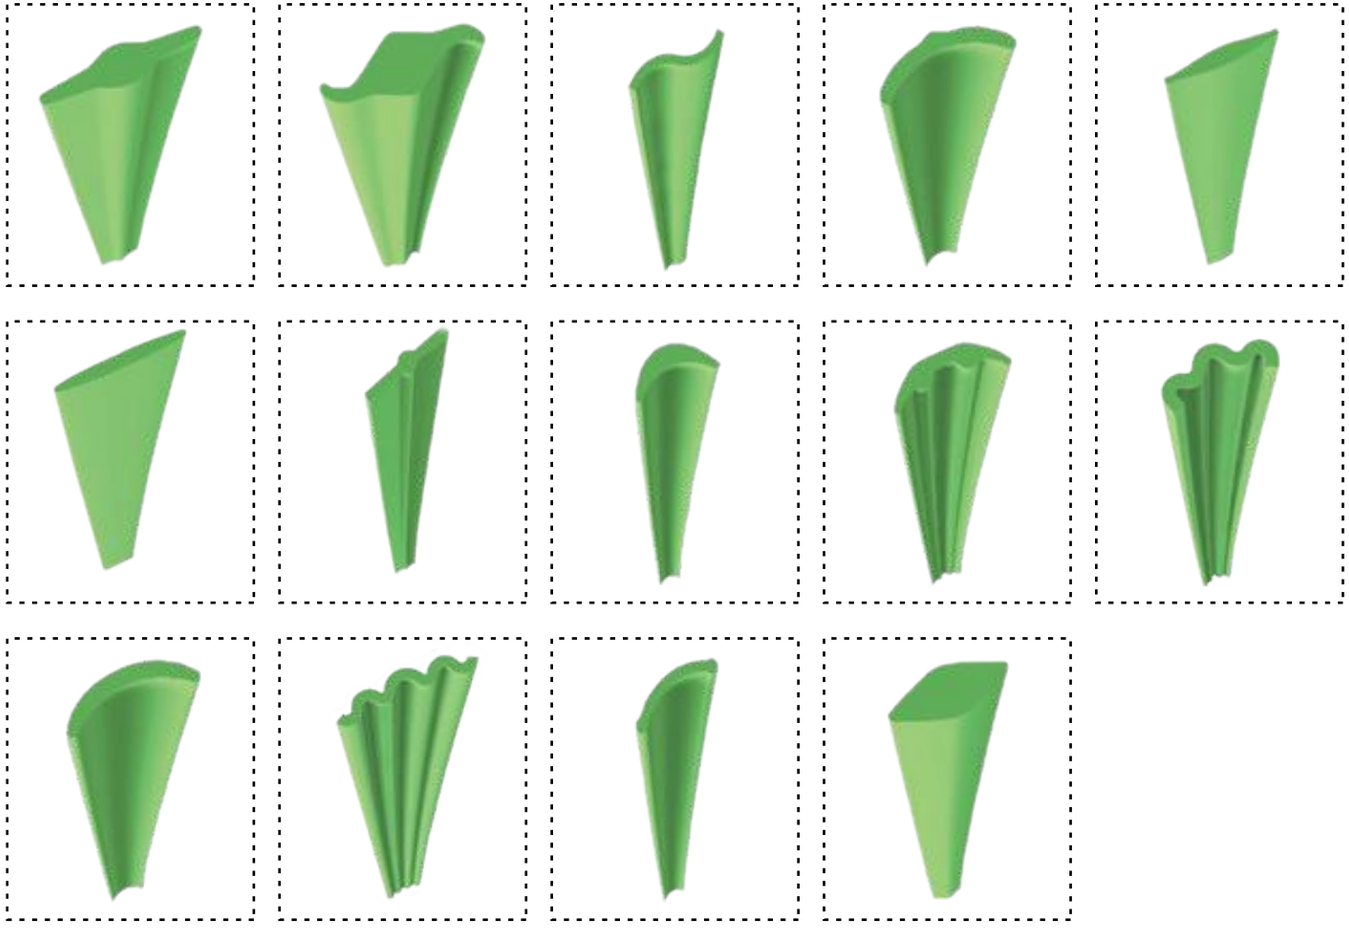

Primary and Secondary Backing:
Provides superior tuft lock and dimensional stability.

PU Backing:
High-performance polyurethane for increased durability.
(Launching soon)

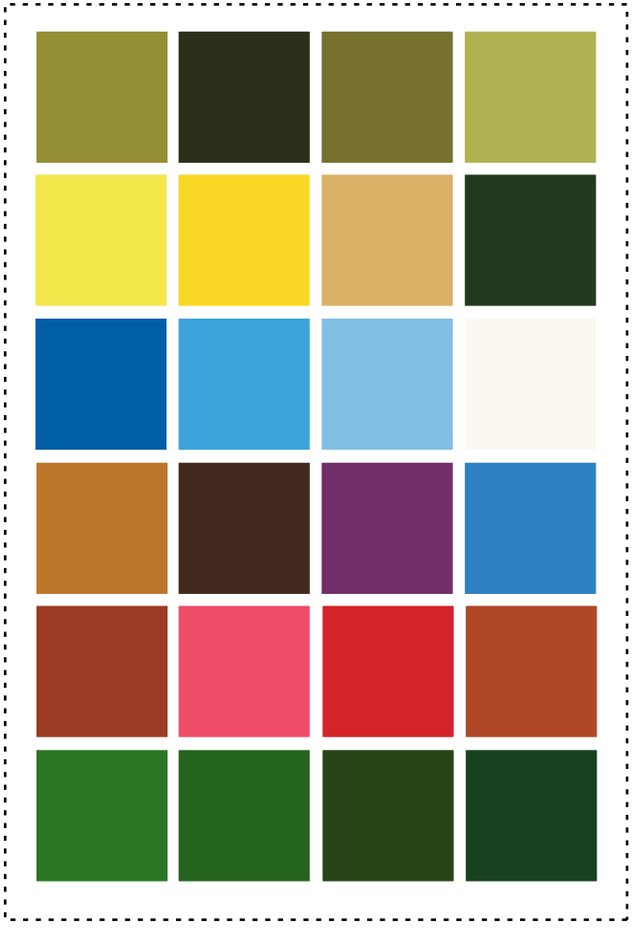

Latex Backing:
Cost-effective and weather-resistant.

Landscape Grass Solutions

Premium Artificial Landscape Grass

Transform outdoor spaces with premium landscape artificial grass, offering natural aesthetics with minimal upkeep. Enjoy the beauty of a vibrant green lawn all year round with minimal maintenance and maximum durability.

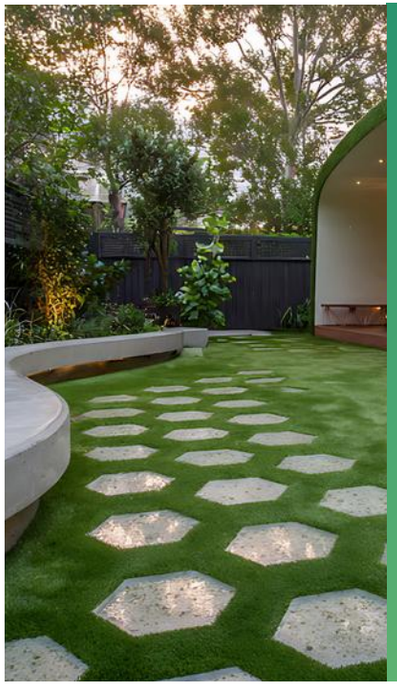

Year-Round Beauty:
Lush, vibrant green lawn that stays beautiful in every season.

Minimal Maintenance:
No more mowing, watering, or pesticides.

Maximum Durability:
Designed to withstand the elements and heavy use.

Enhanced Outdoor Living:
Elevate your outdoor living experience with ease.

Hassle-Free Luxury:
Enjoy a pristine lawn without the usual upkeep.

Our landscape grass is ideal for:

- Residential Gardens
- Parks & Playgrounds
- Commercial Spaces
- Hotels & Resorts

Transform your outdoor space into a lush oasis with landscape artificial grass today!

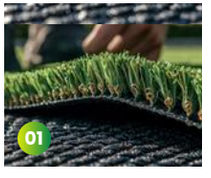

Landscape Turf System

Engineered for Natural Aesthetics, Comfort & Durability

Our landscape turf systems combine advanced monofilament yarn technology, resilient root yarn structures & a durable backing system to replicate the appearance and performance of natural grass while ensuring long-term outdoor durability.

- Straight Fiber
- Root Fiber
- Primary Backing
- Latex

Straight Grass Fiber: Monofilament Yarn Technology
Monofilaments designed with diverse shapes and colors according to the profiles of natural grass in different areas all across the world.

Root Fiber: TX Relax Texturized Yarn
Uniquely designed curly grass fibers to best imitate the vegetation growth in nature, which contributes to a soft and resilient turf surface and support the straight fiber.

Backing System: PP Primary + SBR Latex
Multilayer backing structure to exaggerate dimensional stability, easy installation and convenient maintenance.

Key Landscape Grass Features

- Lush, natural appearance year-round.
- Soft, pet-friendly, and safe for children.
- UV-resistant to prevent color fading.
- Durable backing for high foot traffic areas.
- Sustainable, requiring no pesticides or excessive water usage.

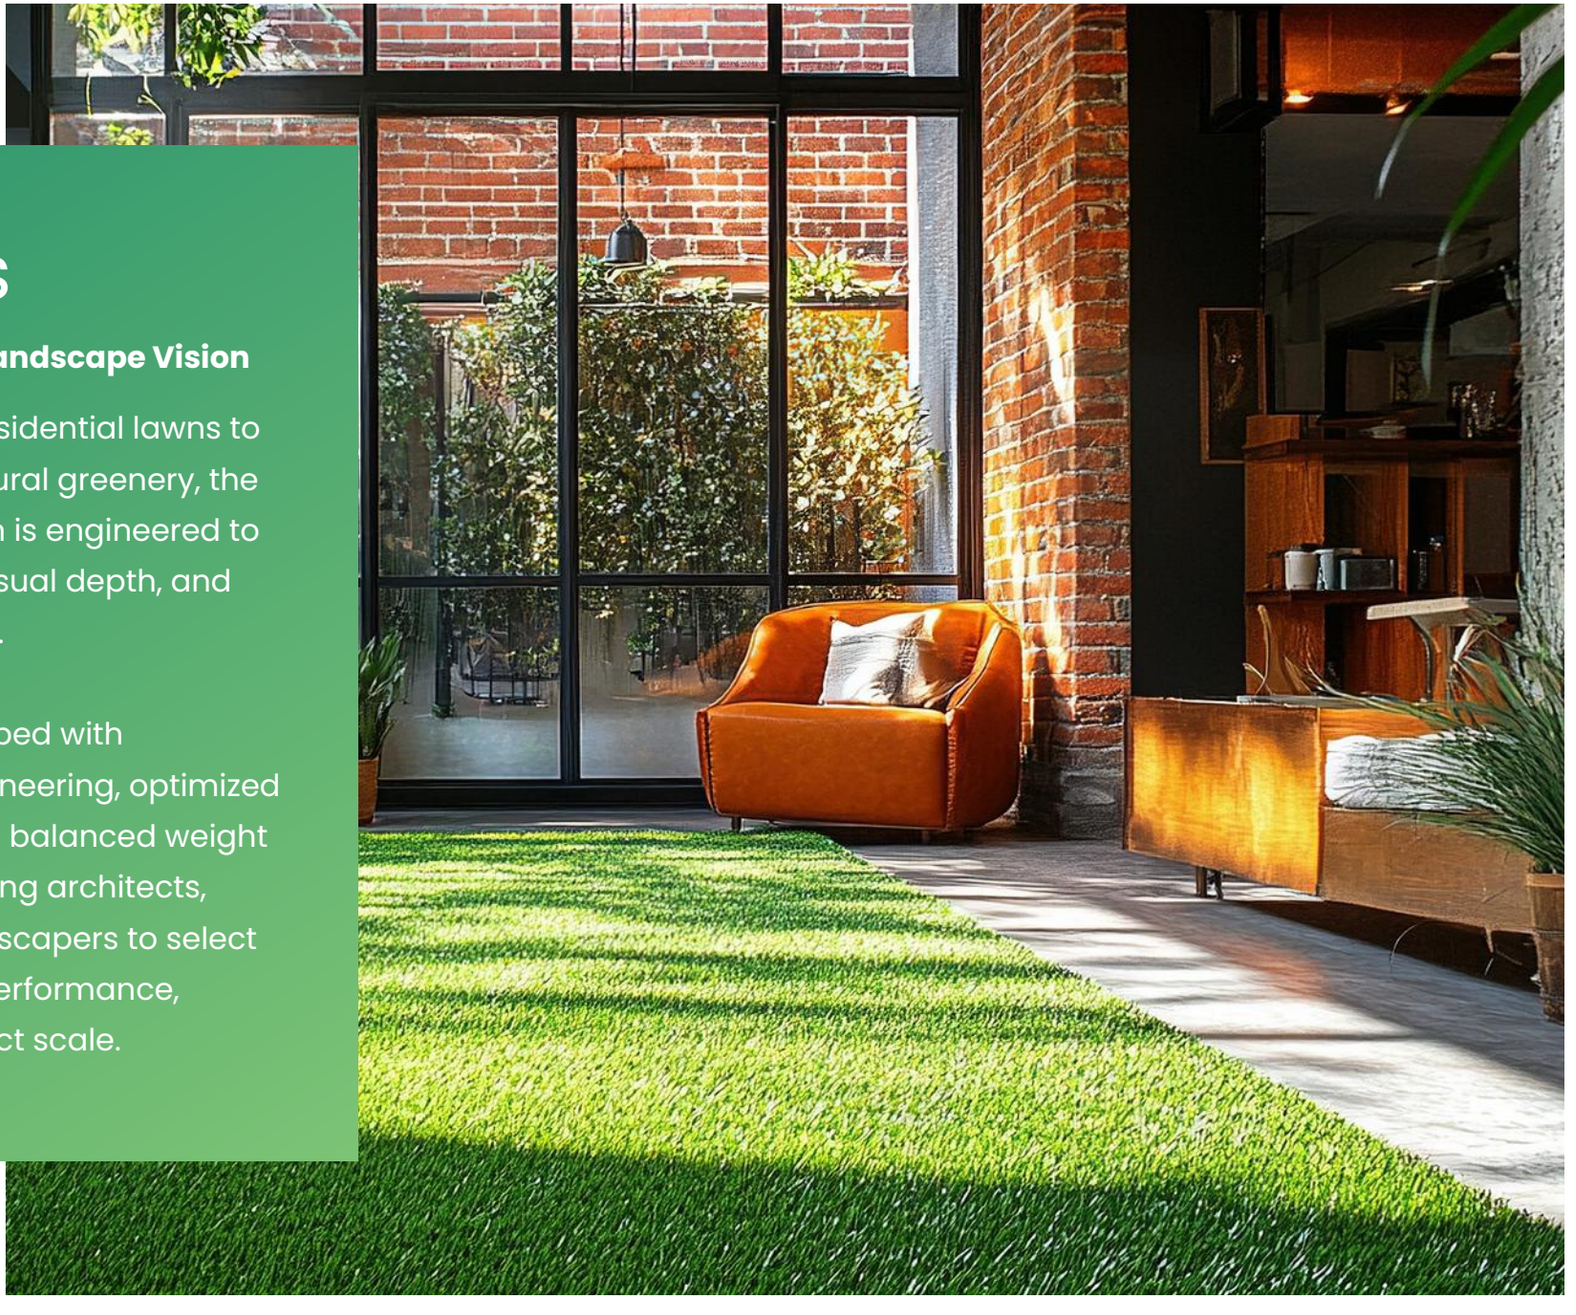

Products

Designed for Every Landscape Vision

From high-density residential lawns to lightweight architectural greenery, the Landscape Collection is engineered to offer performance, visual depth, and installation versatility.

Each range is developed with specialized yarn engineering, optimized backing stability, and balanced weight construction — allowing architects, developers, and landscapers to select solutions based on performance, aesthetics, and project scale.

Racine Max Series

Natural Depth. Structured Performance.

Racine Max is engineered for projects where visual richness meets structural durability. Designed with higher stitch density and optimized pile weights, this range delivers a fuller appearance while maintaining long-term resilience under outdoor conditions. The series offers multiple pile heights from 20 mm to 50 mm, allowing designers to create layered landscape aesthetics — from low-maintenance decorative zones to lush premium lawns.

Dual-tone color combinations enhance realism, while UV-stabilized construction ensures long-lasting color integrity.

Ideal for:

Villas & residential gardens

Hospitality and commercial exteriors

High-visibility green zones

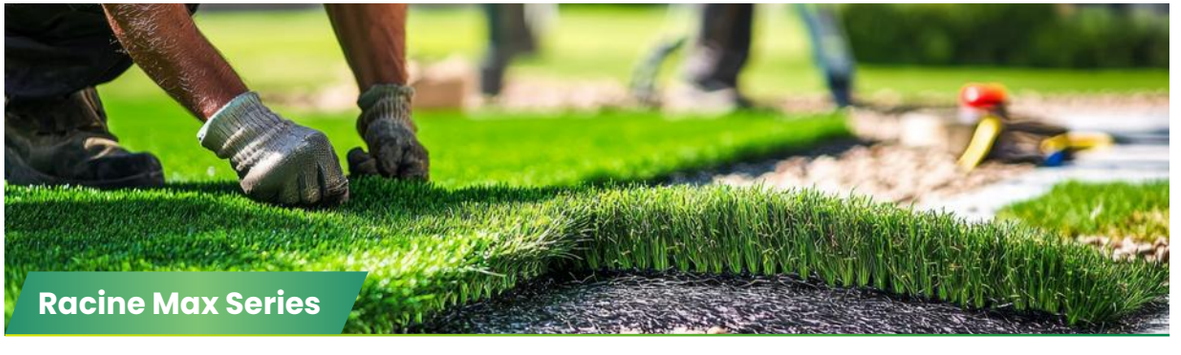

Public landscape areas

Pile Height: 20, 30, 40, 50 mm | Guage: 3/8 | Color: GG: Dark Green / Sport Green | GC: Brown / Thatch Variants

Design Philosophy

Balanced weight structure, dense tufting, and realistic tonal blends to replicate natural grass while ensuring stability and durability.

Dalton Series

Tailored Performance. Engineered Flexibility.

Dalton represents a more refined and customizable landscape solution — developed for projects requiring controlled density, aesthetic precision, and adaptable performance. With optimized stitch rates and engineered yarn weights, this range balances durability with design flexibility. Available in selected pile heights including crescent-style constructions, Dalton delivers a clean, modern lawn profile suited for contemporary landscapes.

Its tailored construction allows specifiers to achieve premium aesthetics while maintaining practical installation efficiency.

Ideal for:

Custom-designed landscapes

Architectural outdoor spaces

Premium residential developments

Designer landscape concepts

Pile Height: 20, 30, 40 mm | Guage: 5/8* | Color: Dark Green / Sport Green

Design Philosophy

Customization-focused construction delivering performance consistency with refined visual character.

NEOM Series

Lightweight Innovation for Modern Landscapes.

Developed with efficiency and sustainability in mind, the NEOM Series introduces a lighter-weight turf system designed for large-scale developments and modern urban projects. Featuring UV-stabilized fleece backing and optimized yarn consumption, the range delivers reliable performance while supporting reduced material usage.

With enhanced water permeability and balanced pile structure, NEOM offers a practical solution for projects requiring efficient drainage and easier handling without compromising visual appeal.

Ideal for:

Large-scale developments

Urban landscape projects

Modern architectural greenery

Cost-optimized landscape solutions

Pile Height: 20, 30, 40, 50 mm | Guage: 3/8 | Color: Dark Green / Sport Green

Design Philosophy

Efficient construction combining lightweight engineering with contemporary landscape aesthetics. Each range within the Landscape Collection reflects a specialized approach to synthetic turf engineering — offering architects and developers the flexibility to design landscapes that balance realism, performance, and project efficiency.

Landscape Artificial Grass Installation Process

Site Preparation

Ground Leveling & Compaction

Install Weed Barrier / Geotextile

Base Layer Installation

Fine Leveling Layer

Roll Out Artificial Grass

Cutting & Alignment

Seaming & Fixing

Brushing & Final Grooming

Final Inspection

Inspect the surface for:

- Even joints
- Proper fixing
- Clean edges
- Uniform appearance

The landscape area is now ready for use.
