### INSTALLATION METHODS

It is expected that the seams of solid and/or near-solid carpet tiles will be visible. This is not considered or accepted as a product defect, because it is due to the inherent characteristic of geometric modular shapes. It is the same as you will see in other modular flooring materials, such as wood planks, resilient (LVT) and/or hard floor.

### ADDITIONAL INFORMATION

The actual product may vary from sample. Specifications are subject to change without notice when such changes do not alter product performance. This carpet is manufactured and recommended for floorcovering use only. We do not assume any liability, real or implied, when carpet is applied otherwise.
