Benefits of Barlinek floors

100% wood
Flooring is made of 100% real wood of the highest quality. We use 100% of this precious material. The sawdust remaining after production is used to make wood pellets and fireplace briquette. The bark is used in our gardens.

Stable construction
The thickness of each layer of the Barlinek flooring is not selected by chance. It is the result of many years of experience, hundreds of hours of research and tests of the natural wood properties. Our

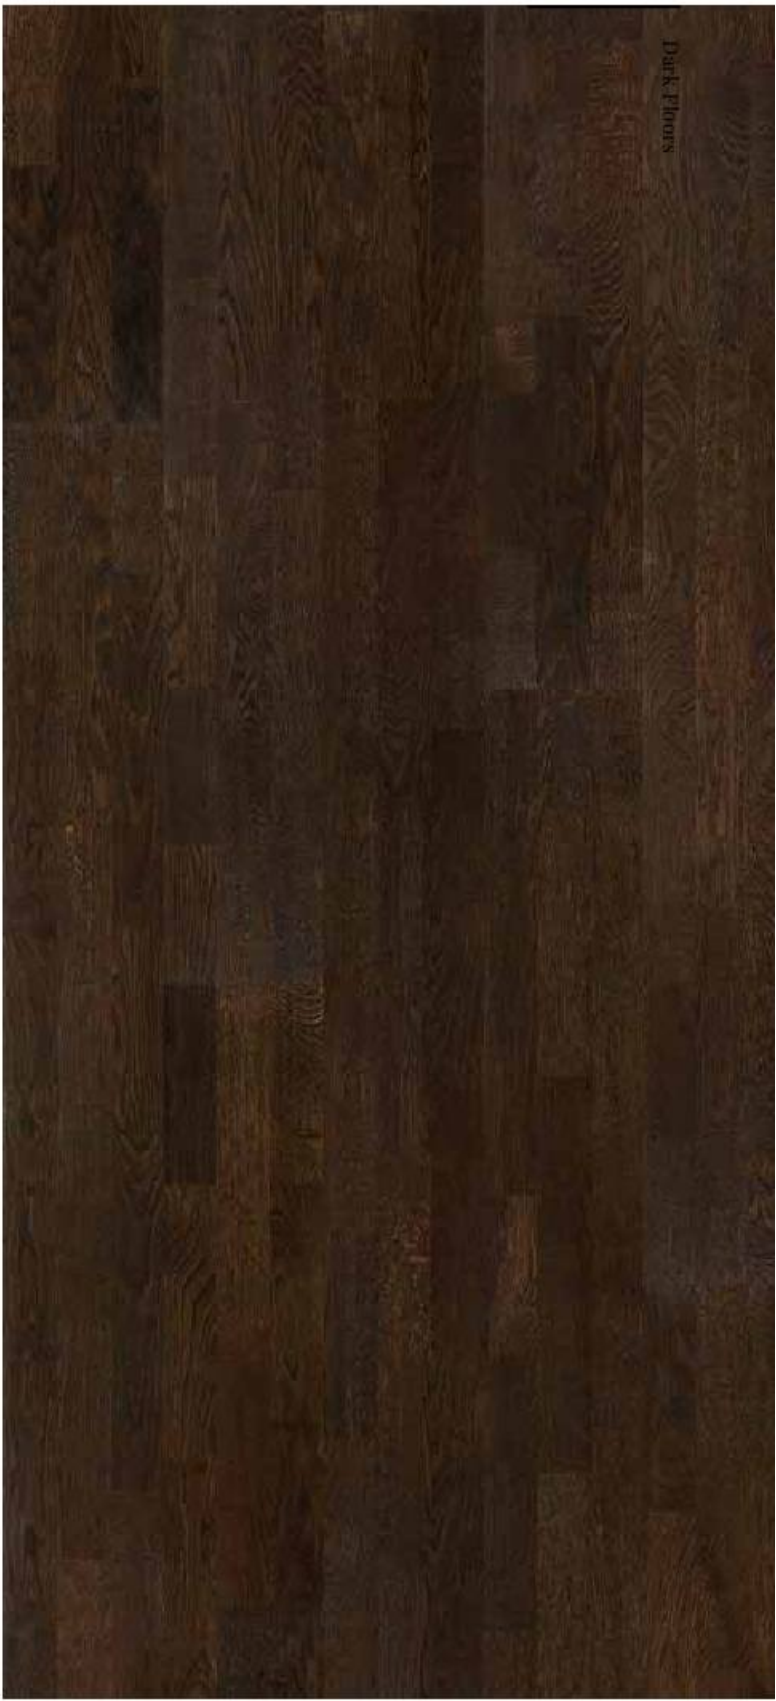

expert knowledge has enabled us to develop a floor with an ideal construction to reduce the natural tensions of the material.

Underfloor heating
Not every wood floor is suitable for underfloor heating. Thanks to its layered structure, the Barlinek flooring perfectly conducts heat and can be successfully applied on both electric and water underfloor heating.
